City of Derby/El Paso Water
 Company 611 N. Mulberry Rd
 Derby, KS 67037
 (316)788-1424

NEW WATER SERVICE INSTALLATION ACKNOWLEDGEMENT

The City of Derby/El Paso Water Company will designate the point at which the customer’s service line may be connected to the company’s main or equipment. The customer is responsible for providing a water service line to the meter location.

- The City designates the location for the water meter box and it will be marked on site with a blue stake and located for installation within 30 days of water meter purchase. If any alterations of the location are required, please call Jason Bradshaw at 788-1151 ext. 4200. (Commercial meter installation scheduling will be coordinated as necessary).
- The proper pipe fitting (1”, 2” etc.) shall be left on site to allow connection to the company’s equipment.
- The water line shall be placed at a depth of roughly 3 ft. at the location of the meter. If the water line is installed prior to meter installation and the proper fitting is provided, the City will make the connection to the meter. If it is not ready, it is the customer's responsibility to make the connection.
- Water service will be provided by tapping the smallest diameter water line available to the property. If the property is a corner lot and/or has multiple water mains to connect to, the shortest distance may be used.
- If the only available option is to tap a large diameter line (larger than 8”), customer is responsible for tapping the main and installation of a valve to isolate the meter and service the line from the main. An inspection will be required.
 - For each water meter 2” or smaller, a 2” gate valve must be installed.
 - The gate valve can be connected with a fitting or tapping sleeve.
- **Do not remove utility flag and paint locates.** This will delay the installation of the service for a minimum of three working days. Utility locates must be in place prior to water meter installation.
- The staked meter location should be kept clear of debris and any items that may interfere with the installation of the meter. Failure to maintain the staked area from interferences will result in the installation being rescheduled or postponed.

The City will charge for replacement or repairs due to negligent or intentional acts of the customer or the customer’s agents, licensees or invitees.

- Upon completion of water service installation, the customer will be responsible for the cost of repair or replacement, if damaged.
- Every effort will be made to avoid conflict between meter location and established sidewalk. Customer is responsible for replacement of sidewalk if the city finds necessary to remove for completion of service installation.

The undersigned requests the City of Derby Utilities/El Paso Water Company to supply metered water and/or sewer service at the address given below. Water meters are the property of the City of Derby. The undersigned agrees to use and pay for the service rendered at this address and agrees to conform to all the rules and regulations governing the service now on file with the utility regulatory body. It is understood the City of Derby/El Paso Water Company may discontinue service for misuse of service or failure of the undersigned to pay for service when due.
